

## KEY INFORMATION DOCUMENT

### Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

### Product

**PRIIP Name:** Average Rate Forward

**PRIIP Manufacturer:** Lloyds Bank Corporate Markets plc (“Lloyds Bank”)

Call 0203 578 0064 for more information

**Website:** <http://www.lloydsbankcommercial.com>

**Date of Production:** 02/05/2026

**You are about to purchase a product that is not simple and may be difficult to understand**

### What is this product?

**Type:** An Over the Counter (OTC) contract - Foreign Exchange Instrument

**Objective:**

The objective of this product is to manage adverse movements in currency rates that you may experience. Note that it may not provide you with complete protection against such exposures. The product achieves its objectives by Lloyds Bank agreeing the terms of an OTC contract with you under which you will make or receive a payment at a fixed future date (Maturity Date) based on the underlying foreign currency exchange rate (FX Spot Rate) over the term of the contract.

Sample Parameters are set out below for the sale of GBP and purchase of EUR:

Currency Pair	GBP/EUR	Forward Rate	1.1349
Currency Amount	EUR 10,000	Reference Days	12
Maturity Date	12 Months	Premium	GBP 00
Ref FX Spot Rate	1.1544		

The product achieves its objectives as follows:

At Maturity Date the average FX Spot Rate is calculated by taking the arithmetic mean of the FX Spot Rate on each of the Reference Days (defined above) and comparing the result to the Forward Rate (defined above).

- If the average FX Spot Rate is below the Forward Rate, Lloyds Bank will make a payment to you.
- If the average FX Spot Rate is above the Forward Rate, you will make a payment to Lloyds Bank.

**Intended Retail Investor:**

This product is intended for retail investors with a short to medium time horizon who:

- (i) Have sufficient knowledge or experience with complex financial products; and
- (ii) Have exposure to the relevant foreign currency and want a level of protection against adverse movements in foreign currency exchange rates.

**Term:**

The term of the Average Rate Forward will depend on how long you wish to protect against adverse movements in foreign currency exchange rates and will be agreed with you before you enter into the product. The product is a bilateral agreement that cannot ordinarily be terminated unilaterally by either you or Lloyds Bank, unless certain events of default or other termination events occur. In this case early termination payments may apply, and you may incur significant losses.

### What are the risks and what could I get in return?

**Risk Indicator:**

The risk indicator assumes you keep the product until the agreed Maturity Date. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to end your product early. You may have to pay significant extra costs to end your product early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance at a very high level. **Be aware of currency risk. Where you receive payments in a different currency the final return you get depends on the exchange rate between the two currencies. This risk is not reflected in the indicator shown above.** This product does not include any protection from future market performance so you could incur significant losses. If we are not able to pay you what is owed you could incur significant losses.

## Investment Performance Information

### a) Factors likely to affect future returns

The factors affecting returns will also affect the product's performance. For this product, the average Spot rate of the currency pair is the only factor affecting return. Your return will vary depending on how the Spot rate performs against the forward rate

### b) Most relevant Index

The most relevant index is the underlying currency pair Spot rate of the Average Rate Forward. On maturity of the contract, the Spot rate directly affects the performance and the expected range of returns of the Average Rate Forward.

### c) What could affect my return positively?

If, on average over the reference days specified in the contract, the currency you are purchasing strengthens against the currency you are selling, then you will receive a payment from the Bank. The greater the change in the exchange rate, the greater the payment from the Bank to you. This means your return will be higher.

### d) What could affect my return negatively?

If, on average over the reference days specified in the contract, the currency you are purchasing weakens against the currency you are selling, then you will have to make a payment to the Bank. The greater the change in exchange rate, the greater the payment to the Bank from you. This means your return will be lower.

### e) Performance in severely adverse market conditions

Foreign Exchange rates can be zero. This means that you could end up making a payment to the Bank equal to the notional of the Average Rate Forward. i.e. you would lose your investment.

## What happens if Lloyds Bank Corporate Markets plc is unable to pay out?

You may be exposed to a risk that Lloyds Bank might be unable to fulfil its obligations in respect of the Average Rate Forward. The product is not protected by any local investor compensation or guarantee scheme. This means that if Lloyds Bank is unable to pay out, you may not receive any amount from Lloyds Bank under the product.

## What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the performance of the product. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, over the recommended holding period. They include potential early exit penalties. The figures assume a nominal value of EUR 10,000. The figures are estimates and may change in the future.

### Costs over time:

The person selling you this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment Scenarios [EUR 10,000]	If you cash in at the end of the recommended holding period
Total costs	EUR 130
Impact on return (RIY) per year	1.34 % each year

### Composition of costs:

The table below shows:

- the impact each year of the different types of costs on the performance of the product at the end of the recommended holding period;
- the meaning of the different cost categories.

The costs below are the maximum values shown and will vary depending on the underlying parameters of the transaction.

### This table shows the impact on return per year

One-off costs	Entry costs	1.34 %	The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less.
---------------	-------------	--------	---

	<b>Exit costs</b>	0.00 %	The impact of the costs of exiting your investment when it matures.
Ongoing costs	<b>Portfolio transaction costs</b>	0.00 %	The impact of the costs of us buying and selling underlying investments for the product.
	<b>Other ongoing costs</b>	0.00 %	The impact of the costs we take each year for managing your investments.

## How long should I hold it and can I take it out early?

**Recommended holding period:** This product is designed to be held to the Agreed Expiry Date. It is a product designed to be entered into for its term and cannot be easily sold. Early termination may occur if certain events of default or other termination events occur, in which case early termination payments may apply.

**Early exit impact:** If the product is terminated early, in whole or in part, an Early Termination Payment may become payable by either you or Lloyds Bank. The Early Termination Payment is linked to market parameters and could be a substantial loss or gain to you. Settlement on early termination will be specific to your Average Rate Forward and will be influenced by a number of factors which include but are not limited to: whether it is an increasing or decreasing foreign exchange rate environment; the movement of the FX Spot Rate since the transaction Trade Date; the amount affected by the early termination.

**The Early Termination Payment is not a penalty charge.** The sum represents the economic value of what Lloyds Bank would have paid or received if the product continued as agreed. Depending on market conditions at the time of the early termination, the settlement calculated could result in a substantial amount being due from you to Lloyds Bank.

## How can I complain?

### Contact us

Should you have any complaints about the product, the conduct of Lloyds Bank and/or the person selling the product, please follow the below steps:

- Include the following information so we can resolve your complaint as quickly as possible: as much information as possible about your complaint; any actions you wish us to take to resolve your complaint;
- Contact your Relationship Manager
- Call us on **0800 072 3572** or **+441733 462 267**
- Contact us online at <http://commercialbanking.lloydsbank.com/contact-us/>; or
- Write to us at **Lloyds Banking Group, Customer Services, BX1 1LT**
